| Git-2.24.1.2-64-bit.exe | 12/13/2019 6:53 AM | Application | 46,977 KB |
| node-v10.16.3-x64.msi | 10/16/2019 3:14 AM | Windows Installer ... | 17,764 KB |
| xampp-windows-x64-7.1.33-1-VC14-inst... | 12/13/2019 6:47 AM | Application | 144,743 KB |

*Click "Next, Next Next then Close or Finish".*

2.  Install Node.

| Name | Date modified | Type | Size |
|------|---------------|------|------|
| students | 12/13/2019 6:57 AM | File folder | |
| Git-2.24.1.2-64-bit.exe | 12/13/2019 6:53 AM | Application | 46,977 KB |
| node-v10.16.3-x64.msi | 10/16/2019 3:14 AM | Windows Installer ... | 17,764 KB |
| xampp-windows-x64-7.1.33-1-VC14-inst... | 12/13/2019 6:47 AM | Application | 144,743 KB |

*Click "Next, Next Next then Close or Finish".*

3.  Install Git.

| Name | Date modified | Type | Size |
|------|---------------|------|------|
| students | 12/13/2019 6:57 AM | File folder | |
| Git-2.24.1.2-64-bit.exe | 12/13/2019 6:53 AM | Application | 46,977 KB |
| node-v10.16.3-x64.msi | 10/16/2019 3:14 AM | Windows Installer ... | 17,764 KB |
| xampp-windows-x64-7.1.33-1-VC14-inst... | 12/13/2019 6:47 AM | Application | 144,743 KB |

*Click "Next, Next Next then Close or Finish".*

4. Copy the "**students**" folder into "**C:/xampp/htdocs**"

| Name | Date modified | Type | Size |
|---|---|---|---|
| students | 12/13/2019 6:57 AM | File folder | |
| Git-2.24.1.2-64-bit.exe | 12/13/2019 6:53 AM | Application | 46,977 KB |
| node-v10.16.3-x64.msi | 10/16/2019 3:14 AM | Windows Installer ... | 17,764 KB |
| xampp-windows-x64-7.1.33-1-VC14-inst... | 12/13/2019 6:47 AM | Application | 144,743 KB |

5. Proceed to "**C:/xampp/htdocs/students**" and click "**server_start.bat**" to start the system.

| Name | Date modified | Type | Size |
|---|---|---|---|
| application | 12/12/2019 5:36 AM | File folder | |
| assets | 11/28/2019 5:35 AM | File folder | |
| bot | 10/4/2019 4:14 PM | File folder | |
| db | 11/26/2019 4:44 AM | File folder | |
| receiver | 12/13/2019 7:48 AM | File folder | |
| system | 10/4/2019 4:15 PM | File folder | |
| uploads | 11/28/2019 5:34 AM | File folder | |
| .gitignore | 12/12/2019 5:31 AM | Text Document | 1 KB |
| .htaccess | 5/11/2019 1:20 AM | HTACCESS File | 1 KB |
| composer.json | 11/26/2019 4:35 AM | JSON File | 1 KB |
| index.php | 5/11/2019 1:20 AM | PHP File | 11 KB |
| README.md | 7/21/2019 2:38 AM | MD File | 1 KB |
| server_start.bat | 12/13/2019 7:37 AM | Windows Batch File | 1 KB |

"*The encircled shows the system successfully start*"

6. Create a database and name it "**attendance**".
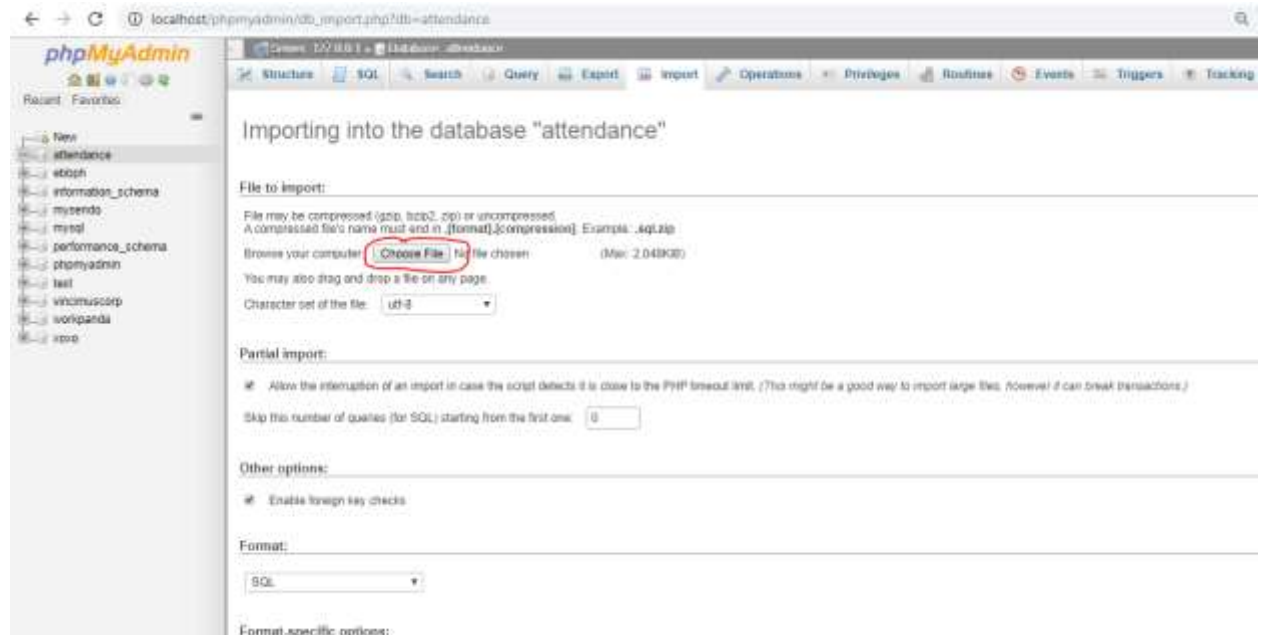

*Click "***New***"*
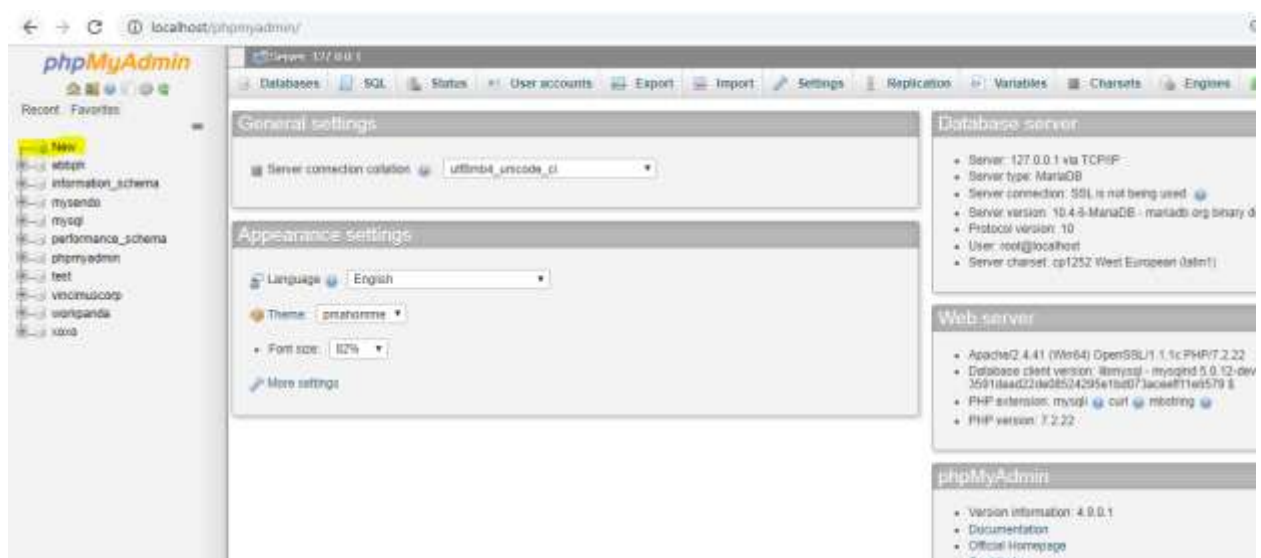

Name it "**attendance**" then click "**Create**".

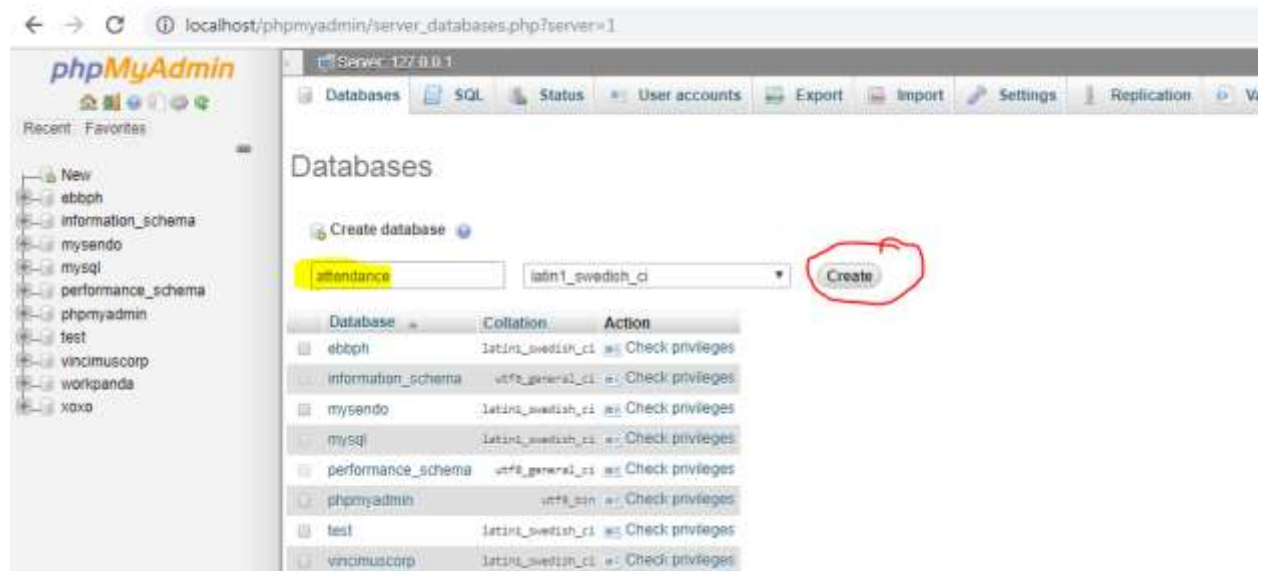

Once created click the "**Import**".

Click "**Choose File**" and select the initial database file in "**C:/xampp/htdocs/students/db**".

Once "**initial-db.sql**" file selected click the "**Go**" button below to import the file.

7. After successful import you may now proceed to Tech-Guardian system. "**http://localhost/students**".
